

General Assembly

Distr.: General
21 December 2015

Original: English

Seventieth session

Agenda items 20 (d) and 124

**Sustainable development: protection of global climate
for present and future generations of humankind**

**Interaction between the United Nations, national
parliaments and the Inter-Parliamentary Union**

**Note verbale dated 16 December 2015 from the Permanent
Mission of Bangladesh to the United Nations addressed to the
Secretary-General**

The Permanent Mission of Bangladesh to the United Nations has the honour to transmit herewith, on behalf of Bangladesh in its capacity as Chair of the Governing Council of the Inter-Parliamentary Union, the text of the outcome document, adopted by consensus in Paris on 6 December 2015, of the parliamentary meeting organized jointly by the Inter-Parliamentary Union and the French Parliament on the occasion of the twenty-first session of the Conference of the Parties to the United Nations Framework Convention on Climate Change (see annex) and requests that the present note verbale and its annex be circulated as a document of the General Assembly, under agenda items 20 (d) and 124.

Annex to the note verbale dated 16 December 2015 from the Permanent Mission of Bangladesh to the United Nations addressed to the Secretary-General

Outcome document

1. We, parliamentarians from around the world, gathered in Paris on the occasion of the twenty-first session of the Conference of the Parties to the United Nations Framework Convention on Climate Change and the eleventh session of the Conference of the Parties serving as the Meeting of the Parties to the Kyoto Protocol, forcefully reaffirm our concern over the consequences of climate change and our determination to take account of it in our national laws and regional parliamentary forums.
2. Caused by human activity, climate change is now documented as beyond dispute by solid global and interdisciplinary scientific work. There is scientific consensus on the existence of climatic warming (according to the latest report of the Intergovernmental Panel on Climate Change, the increase in the average world temperature could be as high as 4.8° C by the end of the century); on a rise in sea levels (by up to 1 metre by 2100, which would affect 1 in every 10 inhabitants on Earth, i.e., from 600 million to 700 million people); and on an increase in extreme weather events (droughts as well as more frequent and intense rainfall and an expansion of desert zones). Climate change thus appears to represent a serious threat to the planet.
3. The impact of climate change is felt throughout the world. It is a global problem with major environmental, economic, social and political repercussions. It is a serious threat to access to water, food security, public health and biodiversity, which could cause extensive forced migrations (between 50 million and 150 million inhabitants could be displaced between now and the end of the century), threaten world peace and especially affect populations in the poorest developing countries.
4. The current trends will produce temperature increases well above 2° C between now and the end of the century. The acceleration of phenomena and of deterioration and change calls for courageous decisions by Governments, parliaments and the international community, which must come together to confront one of the gravest threats known to the planet and to humanity.
5. In this context, we reaffirm the urgency of reducing global greenhouse gas emissions and limiting the increase in average world temperature to less than 2° C relative to pre-industrial levels, in line with the fundamental objective of the United Nations Framework Convention on Climate Change and as agreed by Governments in the Copenhagen Accord of 18 December 2009.
6. We reiterate our belief that the principles of equity, common but differentiated responsibilities and respective capabilities, depending on different national situations, are fundamental for multilateral action to address climate change and should be incorporated into the Paris Agreement.
7. We consider it imperative that the Paris Agreement be an accord by all and for all — a fair, durable and dynamic agreement to fight effectively and accelerate action against climate change over the coming decades. This Agreement must take into account the needs and capacities of developing countries, in particular the

poorest and most vulnerable countries, facilitate the transformation of development trajectories, through knowledge transfer and financing, in order to remain under the 2° C limit, and help each country deal with the impact of climate change.

8. To that end, the Agreement should cover in a balanced manner the issues of mitigation, adaptation and means of implementation (financing, technology, capacity-building), out of a concern for true transparency in the activities conducted by countries, with a common framework defined to achieve this transparency.

9. The priority objective of adaptation should be to reduce vulnerability, in particular among countries most negatively affected by climate change, and especially the small island developing States, including certain Pacific atolls, the countries of Africa, the least developed countries, and certain large megalopolises in coastal areas, mountainous regions and countries, and to achieve sustainable development that is resilient to climate change.

10. The interests of future generations require the promotion of ambitious mitigation and adaptation measures, in favour of sustainable and diversified agriculture, renewable and non- and low-carbon emitting forms of energy, better energy efficiency, more effective management of forest and marine resources and the organization of access to water for all.

11. The financial provisions of the Agreement should give priority to the financing of a transition to low-carbon and climate change-resilient economies. We emphasize the need to intensify the mobilization of financial resources to achieve the objective fixed at Copenhagen of collecting \$100 billion annually in public and private funds by the year 2020. Part of the response to this objective lies in the success of the Green Climate Fund, whose creation was decided in Copenhagen, to serve as the main multilateral fund for the financing of this transition in developing countries. This Fund needs to rapidly secure effective project financing while adhering to the principles of equity, transparency and effectiveness.

12. Research, transfers of technology, knowledge, good practices and support for capacity-building in developing countries by 2020 and beyond are essential elements for climate change adaptation and mitigation, as is the gradual reduction of fossil fuel use. They should be the subject of concrete and measurable commitments.

13. We observe a troubling discrepancy between the global objectives for reduced greenhouse gas emissions and limited increases in average temperature on the one hand, and the national commitments undertaken to achieve those objectives on the other. We therefore reaffirm the importance of national contributions and commitments by every country, on the basis of common but differentiated responsibilities, to help achieve the global objectives. We undertake to exercise the greatest vigilance in finalizing and applying these contributions in each of our countries, to achieve the development of clear and ambitious national legislation on climate and to urge Governments to adapt that legislation based on the results obtained. We underscore the need for an annual review of each country's commitments to ensure that national laws are in line with the emissions reduction objectives.

14. We support the approach of a solutions agenda to help strengthen the ambitions of all countries by offering solutions to be included as part of a low-carbon development strategy compatible with the 2° C objective, through specific

and broad initiatives on the part of non-governmental actors added to the commitments undertaken by States. We consider it necessary for all Governments and civil society actors (enterprises, local communities and non-governmental organizations) to support and strengthen this agenda for action, which is intended to put in place immediate measures without awaiting the entry into force of the Paris Agreement in 2020. Partnerships with stakeholders, and particularly local authorities, economic actors, regional agencies and non-governmental organizations, should be sought out and encouraged.

15. The Paris Agreement should involve not only States but all individuals, particularly young people, while respecting their cultural diversity and also recognizing gender equality as a fundamental principle, given that the numerous effective initiatives which women have driven forward should be systematically taken into account as part of the solutions agenda, and that women should be more closely involved in international negotiations. All the forces of humanist and scientific culture should be brought to bear on the fight against climate change.

16. The promotion and implementation of territorial measures to reduce greenhouse gas emissions constitute a major issue on the climate front. We support the commitments undertaken by local communities in the fight against climate change. As the first to be impacted by the consequences of such change, territories are and should be essential actors in transitioning towards a low-carbon or carbon-free economic model. Parliaments need to encourage and facilitate that effort.

17. In encouraging developers and initiators to accelerate their work, we express the wish that the Paris Conference and subsequent meetings will help to generate momentum for the process and convey the message of economic and social opportunities as part of the fight against climate change. The Paris Agreement, like those to follow, must lead to real and concerted solutions.

18. The fight against climate change cannot be an obstacle to development. The two challenges must be met together. The Paris Agreement must be fully consistent with the Sustainable Development Goals, adopted in New York on 25 September 2015, and with the Sendai Framework for Disaster Risk Reduction 2015-2030, adopted by the Third United Nations World Conference on Disaster Risk Reduction on 18 March 2015.

19. The search for innovative solutions in all areas — mitigation, adaptation, financing, technology transfer, transparency and capacity-building — and the application of science and education will be encouraged by parliaments. Among other activities, parliaments undertake to draw particular attention to the establishment of a carbon credit regime, among other relevant measures.

20. Parliamentarians have an essential role to play in contributing to the success of policies to combat climate change. They share part of the responsibility for their effective implementation. In developing, adopting and modifying legislation, in approving national budgets and in holding Governments to account, they are a key part of the process for putting international agreements effectively in place. We therefore undertake to exercise our powers and responsibilities with the greatest vigour in the global fight against climate disruption.

21. We wish for contacts between parliaments to be a means of strengthening the parliamentary capacity for the implementation and monitoring of climate legislation and the dissemination of good practices. We shall ensure that questions related to

climate change are systematically included in the agenda of inter-parliamentary meetings. We express the wish that the 134th Assembly of the Inter-Parliamentary Union, to be held in Lusaka, will adopt a parliamentary action plan on climate change. The twenty-second session of the Conference of the Parties to the United Nations Framework Convention on Climate Change, to be held in Morocco in 2016, will provide an opportunity to take stock of the mobilizing role of parliaments in the fight against climate change. Cooperation should be developed between the Inter-Parliamentary Union and the competent United Nations bodies to ensure follow-up of the Paris Agreement.

22. We request that explicit reference be made to the role of parliaments and the Inter-Parliamentary Union in the Paris Agreement and that our commitments, as set forth in the present document, be attached to the final acts of the Paris Conference.
